01 Introduction

About us

CEO's Message

History

Our Partnership

About Us

i Partners Group is a global service company that connects the best medical services in Korea and spreads them to the world.

Medical Performance No.1

i Partners Group, an innovative healthcare connectivity platform company

Our main business is to develop and invest in medical & healthcare services and investment in medical & healthcare services utilizing technology, know-how, and infrastructure networks in Korea, and is also focused on the development of medical devices and health foods.

We are closely cooperating with major general and university hospitals in Korea, top specialty doctors in each field, as well as as well as leading medical device manufacturers and health functional food / medical device manufacturers. we are leading the globalization of K-medicine.

i Partners Group aims to contribute to the health and happy life of all mankind.
to contribute to the health and happy life of all mankind.

CEO Message

Hello,
We are i PARTENER GROUP.

The ultimate goal of life is happiness!

We will create value with a trendy perspective to make a healthy world.

Humans invest a lot of effort and time to be happy. However, many people are unhappy because they don't know how to become happy. Although we know health is a crucial element of happiness, how many people are confident about maintaining their health?

As human civilization progresses, life expectancy has increased, but health has not increased proportionally. Now, many people are more concerned about how healthy they can live rather than how long they can live. There is nothing more rewarding than being able to live longer and healthier with our loved ones.

iPartners Group will continue to research and develop for your health, youth, and beauty.

Thank you.

Chairman Yiho Chung

History

i Partners Group is creating new value in the medical field and generating sustainable business to expand globally.

SPECIAL PROGRAM *KRW 35 million*

2 visits required (at least 1 month apart)

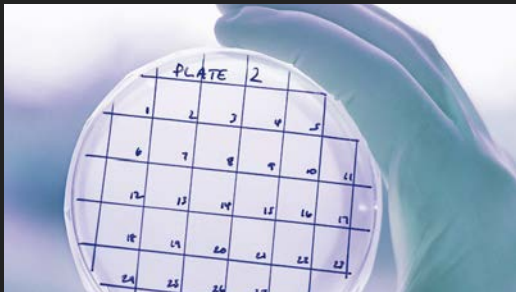

“ Programs only available on i MEDI CLUB ”

i MEDI CLUB SPECIAL B 2 visits required

i MEDI CLUB SPECIAL B 001

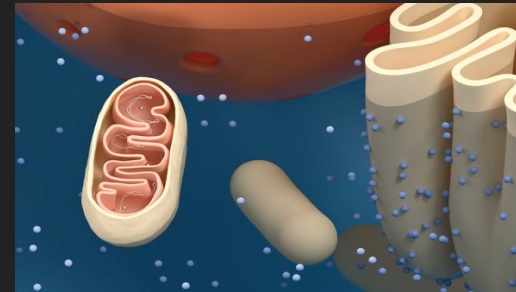

The most basic mono type, with a thread on the end of the needle, is used to insert the thread between the dermis and subcutaneous fat to create cellularity, which is important for wrinkle reduction, firming, and brightening, including the V-line.

i MEDI CLUB SPECIAL B 002

Compared to conventional fat transplantation, the incidence of transplanted fat is high, so it is effective in improving volume and maintaining volume, improving wrinkles, improving volume, and regenerating skin (reducing pores, improving skin tone).

i MEDI CLUB SPECIAL H Optional

i MEDI CLUB SPECIAL H 001

Mitochondria are organelles involved in cell energy synthesis and active oxygen control. Healthy mitochondria are transplanted and treated for dysfunctional diseases such as cancer, aging, diabetes, high blood pressure, obesity, stroke, myocardial infarction, and Parkinson's disease dementia.

i MEDI CLUB SPECIAL H 002

When ionic oxygen is injected into the blood and effective UVC (ultraviolet) rays and magnetic fields are irradiated at a constant rate, waste on the surface of red blood cells and white blood cells in aging human cells fall, purifying the blood healthy and clear.

PACKAGE PROGRAM *USD 30,000*

Laser cataract treatment / presbyopia correction	
glaucoma surgery	
General eye treatment	

Urology

Oriental Clinic

VIP Health Checkup

A VIP health checkup in a private space with a dedicated nurse, conducted in a comfortable and private room to protect privacy and prevent infection.

Platinum Genetic Testing

A test that records the brain's electrical activity using electrodes attached to the scalp, reflecting brain function abnormalities such as insomnia, concentration disorders, depression, anxiety, and dementia

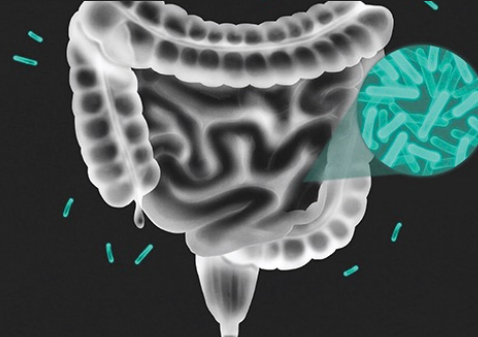

Brain Wave Test

Measuring the length of telomeres located at the ends of leukocyte DNA to determine biological age and evaluating anti-aging through Chaum's programs for a healthy lifestyle.

Telomere Test

A comprehensive program for predicting various diseases and managing prevention by analyzing gut health through microbial testing

Premium Gut Microbial Test

It is a solution program for identifying intestinal health index (GMI) and intestinal type through intestinal microbial testing, as well as disease index and prevention management for various diseases.

Premium Stem Cell Treatment

NK cells are unique immune cells that recognize and directly kill abnormal cells like cancer cells without specific antigens. This cell-based therapy inhibits cancer cell proliferation and is highly effective compared to other treatments.

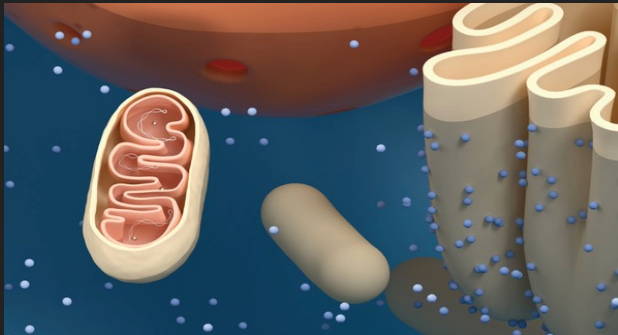

Super NK Cell Therapy

A treatment that collects the patient's blood, proliferates and activates it using the latest culturing techniques, and reintroduces it into the patient's body after two weeks. It is used for various treatments, including cell regeneration and anti-aging.

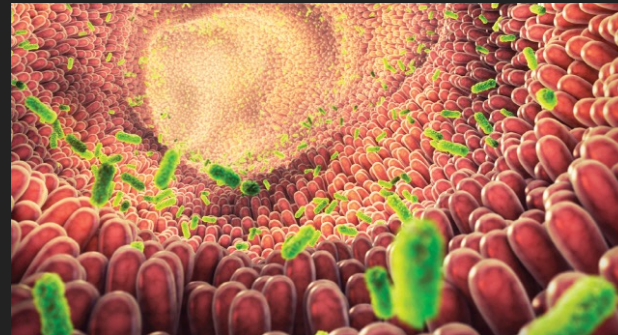

Activated Cell Therapy

Mitochondria are organelles involved in energy synthesis and controlling active oxygen in cells. This treatment transplants healthy mitochondria to treat diseases with functional abnormalities like cancer, aging, diabetes, hypertension, obesity, stroke, myocardial infarction, Parkinson's disease, and dementia.

i MEDI H 001

A treatment that uses healthy person's feces to transplant microbiomes, beneficial for treating bowel diseases, maintaining gut health, and improving overall health.

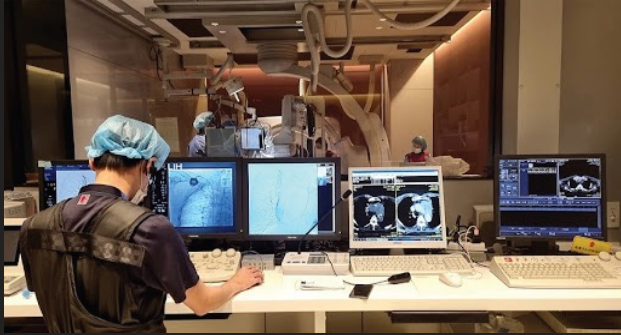

Microbiome Therapy FMT

PDRN is a new treatment that uses DNA fragments similar to human DNA to promote cell regeneration, quickly healing wounds while reducing scar formation and pain.

DNA Therapy with Natural PDRN

PDRN is the most similar DNA fragment to Inje, a new concept treatment that promotes cell regeneration and quickly recovers wounds while reducing scar production and pain.

Advanced Light Therapy

A treatment that uses the property of photosensitive substances to accumulate in cancer cells over time and then destroys the cancer cells by irradiating them with lasers after a certain period.

i MEDI H 002

A therapy that supplements lacking hormones in men and alleviates symptoms caused by hormone deficiency in women, enhancing immunity and anti-aging effects.

Hormone Therapy

A new concept spa combining medicine and relaxation, offering customized health management programs based on the wisdom of East and West and modern sports science. It is excellent for detoxification and immunity enhancement.

Spa Therapy

A program that identifies one's body constitution based on eight constitutional medicine and treats body imbalances and the root cause of pain through acupuncture.

Acupuncture Therapy

A treatment that effectively raises deep body temperature, helping to maintain immunity, assist in weight loss for obese patients, and warm the uterus for women with gynecological diseases.

Quantum Therapy

By effectively raising the core temperature, it is very helpful in maintaining immunity, helping to increase body temperature, and helping obese patients warm the inside of the uterus, which is effective for patients with feminine diseases.

Always more than you expected!
